

META-NET and META-SHARE: An Overview

Georg Rehm

DFKI, Germany

georg.rehm@dfki.de

Human Language Technologies – The Baltic Perspective
Riga, Latvia, October 8, 2010

Co-funded by the 7th Framework Programme of
the European Commission through the contract
T4ME, grant agreement no.: 249119.

- Introduction
- The three areas of META-NET:
 - (1) Community Building and Development of a SRA
 - (2) META-SHARE
 - (3) Innovative MT Research
- The META-NET Website
- Extension of META-NET
- Collaborations

Introduction

A Socioeconomic Experiment

- ❑ Core component of the European Union: a common market with a single information space.
- ❑ Two dozen national and many regional languages.
- ❑ Europe is an ambitious endeavour and an unprecedented socioeconomic experiment.

Two Contradictory Goals?

- ❑ **Goal 1:** to preserve the diversity of Europe's cultural heritage (especially its 23 official languages and numerous local variants).
- ❑ **Goal 2:** to provide all EU-inhabitants with equal access to information and to enable them to participate.

- ◆ **Solution: High-performance, robust, crosslingual and multilingual Language Technology!**
 - enables **communication** across language boundaries,
 - secures equal **access to information**, and
 - supports each language in the **advancement of networked LT ...**

... at least in theory.

- ❑ **Problem:** Pace of progress is too slow to bring LT to a level that can fulfil these goals within the next 10 to 20 years.
- ❑ **We have to accelerate progress!**
 - But: Language Technology landscape in Europe is highly fragmented.
 - All stakeholders such as research communities, LT industry, user industries, language communities, funding programmes and policy makers have to team up for a dedicated major push.
- ❑ **We need an alliance of stakeholders dedicated to a large coordinated effort:**
 - META – The Multilingual Europe Technology Alliance
 - Goals: to assemble and to represent the European LT community, to speak with one voice, to pursue a convincing research agenda.

A Simple Mechanism

Examples from other Fields

- ❑ **ARTEMIS** – the European Technology Platform for Advanced Research and Technology for Embedded Intelligence and Systems
- ❑ **AAL** – The Ambient Assisted Living Joint Programme
- ❑ **EPoSS** – The European Technology Platform on Smart Systems Integration
- ❑ **NEM** – The European Technology Platform on Networked and Electronic Media
- ❑ **NESSI** – The European Technology Platform Networked European Software and Services Initiative

- ❑ T4ME Net: “Technologies for the Multilingual European Information Society”
 - Funded under FP 7
 - 13 partners in 10 countries.
 - Coordinated by DFKI.
 - Area: Language-based interaction (ICT-2009.2.2)
 - Grant agreement no.: 249119
 - Total cost: €7.62 million (EU contribution: €5.99 million)
 - Execution: From Feb 1, 2010 to Jan 31, 2013 (36 months)
- ❑ To avoid multiple brand names, META-NET is used in external communication exclusively.

Founding Members

- ❑ Deutsches Forschungszentrum für Künstliche Intelligenz GmbH, Germany
- ❑ Barcelona Media – Centre d'Innovació, Spain
- ❑ Consiglio Nazionale Ricerche – Istituto di Linguistica Computazionale “Antonio Zampolli”, Italy
- ❑ Institute for Language and Speech Processing, R.C. “Athena”, Greece
- ❑ Charles University in Prague, Czech Republic
- ❑ Centre National de la Recherche Scientifique – Laboratoire d'Informatique pour la Mécanique et les Sci.s de l'Ingénieur, France
- ❑ Universiteit Utrecht, The Netherlands
- ❑ Aalto University, Finland
- ❑ Fondazione Bruno Kessler, Italy
- ❑ Dublin City University, Ireland
- ❑ Rheinisch Westfälische Technische Hochschule Aachen, Germany
- ❑ Jožef Stefan Institute, Slovenia
- ❑ Evaluations and Language Resources Distribution Agency, France

- ❑ META-NET is a NoE dedicated to fostering the technological foundations of the European multilingual information society:
 - Build META, a strategic alliance that includes multiple stakeholders to prepare the ground for a large-scale concerted effort.
 - Strengthen the European research community.
 - Approach open problems in MT in collaboration with other fields.

A funnel-shaped diagram with three horizontal bars of decreasing width from top to bottom. The top bar is orange, the middle bar is yellow, and the bottom bar is yellow. Each bar contains text.

Building a community with a shared vision and strategic research agenda

Building META-SHARE, an open resource exchange

Building bridges to neighbouring technology fields

Community Building

Shared Vision and SRA

Building a community with a shared vision and strategic research agenda

- ❑ Mobilize researchers, decision makers, users and providers of LT, R&D programmes for cooperation and collaboration in META.
- ❑ Large-scale joint action to
 - Surveying and charting the field
 - Creating a shared vision
 - Preparing a Strategic Research Agenda
 - Building a multiplayer community via external liaisons, promotion, etc.
 - Identifying stakeholders, informing them about our initiative, dangers and challenges of the situation, LT support for their language etc.

From Visions to the SRA

- ❑ **Vision Groups** bring together researchers, developers, integrators and (actual or potential, corporate or professional) users of LT-based products, services and applications (ca. 20 members each).
- ❑ A **Technology Council** will prepare a vision paper “European Multilingual Information Society 2020”, a comprehensive roadmap including individual roadmaps for key socio-economic sectors, light-tower application visions.
- ❑ Finally, a **Strategic Research Agenda** will be presented by the Council (has to reflect the opinions and needs of all stakeholders).

Three Vision Groups

- ❑ **Translation and Localisation** (technical documentation, official bulletins, GUI localisation, games, services etc.)
 - Target stakeholders: large users of translation services, (machine) translation, software companies, game companies, localisation industry
- ❑ **Media and Information Services** (audiovisual sector, news, digital libraries, portals, search engines etc.)
 - Target stakeholders: media industries, search engine providers, archives
- ❑ **Interactive Systems** (mobile assistance, dialogue translation, call centres, etc.)
 - Target stakeholders: mobile software and service providers, telecom industry, call centres

- ❑ Vision Group **Translation and Localisation**
 - 23/07/2010 Berlin, Germany
 - 28/09/2010 Brussels, Belgium
- ❑ Vision Group **Media and Information Services**
 - 10/09/2010 Paris, France
 - 15/10/2010 Barcelona, Spain
- ❑ Vision Group **Interactive Systems**
 - 10/09/2010 Paris, France
 - 05/10/2010 Prague, Czech Republic

The Process

- ❑ Initial results (**Translation and Localisation** Vision Group).
- ❑ Five topics from the first meeting have strong visionary potential:
 1. New modes of research studying and involving human translators.
 2. A new role for the human in the machine translation process.
 3. New computing and deployment models (e.g., specialized services, trust centres, standard data formats, standard platforms such as UIMA).
 4. New ways of sharing resources and knowledge in R&D.
 5. New, transparent business models.

META=NET

- ❑ Please provide input in the discussion forum on our website.
- ❑ Tell us your ideas and priorities!

The screenshot shows a web browser window with the address bar displaying 'http://www.meta-net.eu/forum'. The page title is 'Forum — META Multilingual Europe Technology Alliance'. The META logo is prominently displayed at the top left, with the tagline 'A Network of Excellence forging the Multilingual Europe Technology Alliance'. Below the logo, there is a navigation menu with links to 'META-Vision', 'META-SHARE', 'META-Whitepapers', 'META-Events', 'Forum', 'Blog', 'Info Centre', and 'Calendar'. A search bar and a language dropdown menu (set to 'English') are also visible. The main content area features a paragraph about Vision Groups, followed by a red prompt to register. Below this is a table titled 'Vision Groups' with three columns: 'FORUM NAME', 'CONVERSATIONS', and 'MOST RECENT COMMENT'. The table lists four categories: Media and Information Services, Interactive Systems, Text Translation and Localisation, and General Discussions, each with a description and a status of 'No conversations started'. At the bottom of the page, there is a footer mentioning funding from the 7th Framework Programme of the European Commission.

The **Vision Groups** are an important instrument within META-NET. Vision Groups meet twice a year to generate domain-specific visions and roadmaps in the form of technology forecasts. This includes ideas for innovative applications of language technology and scenarios for the future knowledge society. This discussion forum is an additional means to collect visions and opinions from people that may not be able to attend the face-to-face Vision Group meetings.

Please register to participate in the discussion.

FORUM NAME	CONVERSATIONS	MOST RECENT COMMENT
Media and Information Services This forum deals with the audiovisual sector, news, digital libraries, portals, search engines, etc., where the stakeholders are media industries, web and search engine providers, archives, etc. The organisers of the group are Stelios Piperidis (ILSP, Greece) and Margaretha Mazura (EMF, UK).	0	No conversations started
Interactive Systems This forum deals with areas such as mobile assistance, speech translation, call centres, etc., where the stakeholders are mobile software and service providers, telecom industry, call centres, games industries, etc. The organisers of the group are Joseph Mariani (LIMSI/CNRS, France) and Bernardo Magnini (FBK, Italy).	0	No conversations started
Text Translation and Localisation This forum deals with fields such as technical documentation, consumer information, official bulletins, user interface localisation, games, services, etc. where the stakeholders are software companies, game companies, large users of translation services, translation companies, localisation industry, etc. The organisers of the group are Hans Uszkoreit (DFKI, Germany) and Josef van Genabith (DCU/CNGL, Ireland).	0	No conversations started
General Discussions This forum is open for related discussions.	0	No conversations started

META-NET

META-SHARE

Building META-SHARE, an open resource exchange

- ❑ Data has become a key factor in LT (see LREC, corpora mailing list).
- ❑ Expensive data become valuable through sharing.
- ❑ However, the long demanded and well-contemplated instruments for managing and sharing this data are still missing.

META-SHARE: Key Features

- ❑ META-SHARE is an open, integrated, secure, and interoperable exchange infrastructure for language data and tools for the Human Language Technologies domain.
- ❑ A marketplace where language data and tools are documented, uploaded and stored in repositories, catalogued and announced, downloaded, exchanged, aiming to support a data economy (includes free and for-a-fee LRs/LTs and also services).
- ❑ Standards-compliant, overcoming format, terminological and semantic differences.

META-SHARE

Notes:

Harvesting: Metadata Harvesting (OAI-PMH)

META-SHARE Inventory: Every META-SHARE inventory will contain a copy of all the harvested metadata across core and peripheral/local repositories, the statistics database, and a web server.

P2P Network: An interconnected network of the core WP8 partners' inventories. It will assure synchronisation between core inventories.

Web GUI: A portal which will handle requests (search, browse, view results) and distribute them according to traffic criteria (load-balancer). The user will be transparently served by one of the core inventories.

What we're offering

- ❑ A channel to share and distribute language data and tools.
- ❑ Technical solutions for building your own repositories.
- ❑ Protocols and mechanisms for making the descriptions of your resources (and the actual resources) harvestable.
- ❑ Guidelines and recommendations on standards used in the LR production and documentation processes.
- ❑ Recommendations on data and tools licensing issues.
- ❑ **Access to large catalogues of documented, high-quality resources, as well as the actual data and tools.**

Sneak Peak

META  NET

META  SHARE

Sneak Peak (Version 0)

Welcome to META-SHARE!

META-SHARE is developed within the META-NET Network of Excellence

» [browse metadata catalogue](#)

What is it? About the project.

META-NET aims at creating META-SHARE, a sustainable network of repositories of language data, tools and related web services documented with high-quality metadata, aggregated in central inventories allowing for uniform search and access to resources. Data and tools can be both open and with restricted access rights, free and for-a-fee. META-SHARE targets existing but also new and emerging language data, tools and systems required for building and evaluating new technologies, products and services. In this respect, reuse, combination, repurposing and re-engineering of language data and tools play a crucial role.

META-SHARE will eventually be an important component of a language technology marketplace for HLT researchers and developers, language professionals (translators, interpreters, content and software localisation experts, etc.), as well as for industrial players, especially SMEs, catering for the full development cycle of HLT, from research through to innovative products and services.

How can I use it? First steps.

More specifically, META-SHARE will be a freely available facility, supported by a large user and developer community, based on distributed networked repositories accessible through common interfaces. Users (consumers, providers or aggregators) will have single sign-on accounts and will be able to access everything within the repository. Each language resource will be given a permanent locator (PID). One of the key features of META-SHARE will be metadata harvesting, allowing for discovering and sharing resources across many repositories.

META-SHARE will also cater for advanced metadata schemata regarding description, harvesting and discovery of resources. It will be accompanied by a search function, so that users can search and navigate through its resources in the most flexible way possible. META-SHARE will allow the easy integration of new functionalities and services. In order to ensure modularity and robustness, it will follow a service-oriented architecture. Moreover, it will handle equally effective diverse file types. Finally, META-SHARE will provide the ability to compile and produce statistical reports, according to the different user types. The repository administrator will be able to supervise all of the above.

Connect and share! Our vision.

META-SHARE will start by integrating nodes and centres represented by the partners of the META-NET consortium. It will gradually be extended to encompass additional nodes/centres and provide more functionality with the goal of turning into an as largely distributed infrastructure as possible.

- ❑ **META-SHARE Version 1: July 2011**
 - Stable, working version of META-SHARE to be rolled out within the META-NET consortium.
- ❑ **META-SHARE Version 2: February 2012**
 - Stable version, ready for production use.

META-NET

Innovative MT Research

- ❑ Cooperation and building bridges
 - within the project (machine translation community)
 - outside (neighbouring research communities such as, for example, machine learning, knowledge management, etc.)
- ❑ Four scientific goals that have not been addressed yet in a systematic way in the MT community are pursued:
 - Bringing more semantics into translation
 - Optimising division of labour in hybrid Machine Translation (consolidation of paradigms)
 - Exploiting the “context” for translation (e.g., multimedia)
 - Extending the empirical base for machine translation (using advanced machine learning)

META-NET

Extension of META-NET

- ❑ T4ME is a funded project.
- ❑ META-NET is a Network of Excellence:
 - currently based on the initial T4ME consortium.
 - covers ten countries.
- ❑ Multiple European countries are *not* represented in META-NET.
- ❑ Of course we want to extend the Network of Excellence.

Extension of the Network

- ❑ Upcoming: three new consortia (ICT PSP call).
- ❑ Objectives (selection):
 - To collect, polish, upload, share LRs and LTs (via META-SHARE).
 - To carry out mobilisation and outreach activities in their countries.
- ❑ Start: early 2011
- ❑ META-NET will be extended by all partners of these consortia and also by individual researchers who support the initiative.
 - Goal: all EU member states and as many of the non-member states as possible to be covered.

Extension of META-NET

- Current and future composition of META-NET:

Year	Members	Countries	
2010	13	10	Current composition.
2011	39	28	Including the three new consortia.
2011	43	31	Including the three new consortia and a few additional contacts; <i>all</i> EU member states covered.

Collaborations

META[≡]NET

CLARIN

Common Language Resources and Technology Infrastructure

- ❑ Facilitates research by coordinating and making existing Language Resources and tools available and readily useable for the Social Sciences and Humanities.
- ❑ Offers resources and services to allow computer-aided language processing (e.g., querying data and complex processing of data sets).
- ❑ Focus on eResearch, eScience.
- ❑ Building and offering results for Language Technology at large.
- ❑ Clear orientation towards ICT (development, innovation and services including commercial).
- ❑ Focus on the distribution of Language Resources (currently).
- ❑ End user: the European citizen.
- ❑ Goal: to address the problem of multilingualism in Europe.

META-NET

Wrapping up ...

Participate in META!

- ❑ Let's shape the future of Europe's linguistic and also Language Technology landscape and boost LT support significantly!
- ❑ Researchers, professionals, administrators developing, providing or using LT: please contribute ideas.
- ❑ Educators, journalists, politicians, public administrations and organisations participate in the public discussions on the visions and steps towards a truly multilingual information society.
- ❑ RTD projects can provide and use resources via META-SHARE.
- ❑ Propose projects that contribute to the multilingual digital information space (ICT FP7 Call 7 and SME-DCL; ca. 85 mio. EUR)

- ❑ **META-FORUM 2010** – Challenges for Multilingual Europe.
- ❑ November 17/18, Hotel Le Plaza, Brussels, Belgium.
- ❑ Outreach and mobilisation event – primarily aimed at LT industry.
- ❑ Programme includes EC info-session on Call 7 and Call SME-DCL.
- ❑ Ideal networking opportunity.
- ❑ Register soon: interest is *very* high, we only have limited capacity.

Ļoti pateicos.

Tānan väga.

Labai ačiū.

Thank you very much.
